JOHN DEERE

CASE

TEREX

WEATHERFORD

TANA

## OUR SERVICES

**Design Engineering**  
We review prints for manufacturability before beginning.

**3D Modeling - Fit & Function**  
SolidWorks modeling to verify form, fit, and function.

**Steel Fabrication & Weldments**  
High-level welding, heavy structures, & precision weld assemblies.

**In-house Material Processing**  
HD plasma/laser cutting, steel forming, & CNC machining.

**Full Finishing**  
Sandblasting, industrial painting, & powder coating.

**Final Assembly**  
Units are complete, assembled, and ready to ship.

## WHY HUMDINGER

Direct access to engineers & ownership

Decades of experience across various industries

3D modeling to verify fit & function before production

Capable of large scale, complex projects while maintaining responsive communication

Streamlined quote-to-production process

Customizable certified rebuild programs

## WHO WE SERVE

OEMs whose demand has outpaced production

Engineering teams who need a manufacturing partner

Companies moving production back to the U.S.

OEMs who value communication & personalized support

Small, medium, or large manufacturers

OEMs looking for a controlled cost

## QUALITY

QC in Every Part of the Process

## PARTNERSHIP

Long Term Relationship Driven

## CAPACITY

Scalable Manufacturing Production

### FROM PRINT TO DELIVERY

**1 Send Your Prints**  
Email drawings or CAD. We review for fit and manufacturability at no charge.

**2 Honest Quote**  
Competitive pricing and a lead time we will achieve. No surprises.

**3 Built In-House**  
Direct updates from our engineers throughout production - not a call center.

**4 Delivered on Time**  
Completely finished, inspected, tested, and shipped ready to install.

*Send us the prints - we will earn the job.*
