

— BASED IN TEXAS

Heavy Fab. On Time.

Engineered fabrication for oil & gas operators who need work done right.

TRUSTED
BY

Weatherford

Cameron

Caterpillar

Regional O&G Operators & EPCs

PAST PROJECTS

Various custom parts & assemblies

Wellsite platforms & access structures

Equipment skids & production frames

Pump jack subbases & belt guards

Pipe racks & structural steel

WHY HUMDINGER

Direct access to engineers & ownership

Quality engineering tailored to each product

100% U.S. based manufacturing: No overseas delays or tariffs

Streamlined quote-to-production process

WHO WE SERVE

Upstream & midstream operators

EPC contractors

Oilfield service companies with custom products

OEMs whose demand has outpaced their production capacity

Customers needing anything from low to high volume manufacturing

OUR SERVICES

Design Engineering

We review prints for manufacturability.

3D Modeling - Fit & Function

SolidWorks modeling to verify form, fit, and function.

Steel Fabrication & Weldments

High-level welding, heavy structures, & precision weld assemblies.

In-house Material Processing

HD plasma/laser cutting, steel forming, & CNC machining.

Full Finishing

Sandblasting, industrial painting, & powder coating.

Final Assembly

Units are complete, assembled, and ready to ship.

100+

Years of Manufacturing Experience

PARTNERSHIP

Long Term Relationship Driven

QUALITY

QC in Every Part of the Process

CAPACITY

Scalable Manufacturing Production

FROM PRINT TO DELIVERY

1 Send Your Prints

Email drawings or CAD. We review for fit and manufacturability at no charge.

2 Honest Quote

Competitive pricing and a lead time we will achieve. No surprises.

3 Built In-house

Direct updates from our engineers throughout production - not a call center.

4 Delivered on Time

Completely finished, inspected, tested, and shipped ready to install.

Send us the prints - we will earn the job.
